## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species:

- I. figs. 2-4;
- II. figs. 5-7;
- III. figs. 8 and 9;
- IV. fig. 10A;
- V. fig. 10B;
- VI. fig. 11; and
- VII. figs. 12-15.

The species are independent or distinct because:

Inventions I-VI and VII are directed to related a wiping mechanism. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, species I directs<sup>to</sup> a wiping mechanism having capillary passageway; species II directs to a wiping mechanism having multiple tips oriented in a certain angle; species III directs to a wiping mechanism similar to that in species II with the addition of

Art Unit: 2861

two more wiping tips aligned in a straight line and disposed in between species II; species IV directs to a wiping mechanism having parallel and staggered form of wiper tips arrangement; species V directs to a wiping mechanism having like two sets of staggered wiper tips, if a horizontal line is drawn across in between the centered wiper tips, then one set of wiper is an image of the other with respect to the drawn center line; species VI directs to a wiping mechanism having angled wiper tips, which are overlapped near one of the end of the tip portion of the wiper; species VII directs to a wiping mechanism having a polygon shape.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-wen Hsieh whose telephone number is 571-272-2256. The examiner can normally be reached on 7:30AM -5:00PM.
